

Rail Safeworking Capability Statement

At Track Protection Australia we specialise in Rail Safeworking.

Track Protection Australia has taken on an ambitious task, to help create the next generation of high-quality Safeworking professionals to meet a growing demand, within a growing industry.

TPA has teamed up with Nugroup Rail Solutions, one of the country's largest and most trusted specialist rail services providers; and Training Ahead Australia, one the country's most progressive and exciting rail training providers.

It is this collision between Nugroup's decades of rail experience and TPA's constant search for new ways to make our industry safer and more efficient; using technology and thinking, that challenges the 'way things have always been done' mentality.

The alliance with TPA will ensure learning and continuous improvement remains a key pillar for team members at every level. Leveraging the vast experience that is found at Nugroup will help ensure that the skills and lessons of the past, are passed onto the next generation of rail professionals.

We can provide the following Safeworking services:

Victoria	New South Wales
